

# JU Play

RECORD, UPLOAD & SHARE...

PLAY.JU.SE

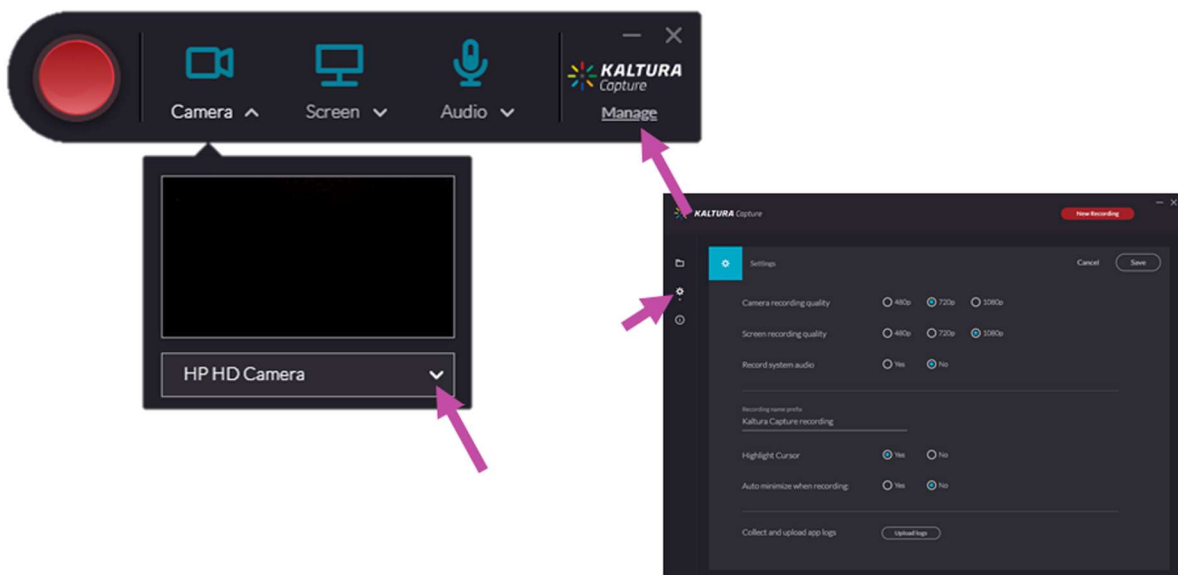

The first time you make a recording you have to download the Kaltura Capture video recorder from the JU Play web page:  
Go to PLAY.JU.SE and press LOG IN. Choose Jönköping University and log in with you JU account. Press "ADD NEW" and "Make A Recording".

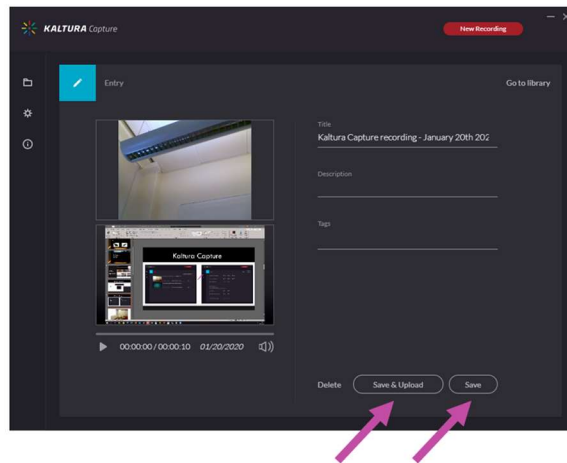

Download is available for Windows or Mac. Once the download is completed go back to the webpage and press "ADD NEW" and "Make A Recording" again and Kaltura capture will launch.

Below you can see the Kaltura Capture video recorder. It is possible to record up to three things at the same time, for example a camera, you screen and your microphone. If you do not want to use for example the camera you turn it of by clicking on the camera icon. To change to another camera or to another screen you press the arrow beside the icon. You have to make these choices before you do your recording. You should also check the settings under "Manage" and then the cogwhele before you begin recording. Once set press the red button to start your recording.

When the recording is done you will see this meny. Here you give the recording a proper title and then use the "Save & Upload" option. The recording will then be saved both on the C-drive and uploaded to JU Play.

Once uploaded you can find your recording under your profile name and then My Media.
